

In the Box Consulting

We don't go outside the box!

Outside the box is a popular cliché, but we avoid that at all costs. You have a challenge or problem, and we'll find a solution. While our solutions may apply creative, new thinking to solve problems and overcome challenges, we prefer the simplest way to implement those solutions.

With our approach, not only do you know that your challenge is being solved, you know where you are in the process. We tackle the complex challenge and get the solution into its simplest form, usually a checklist. We work with you on each step--including sending calendar reminders if needed. No deadlines are missed--every box gets checked.
